

**OPERATION
CHRISTMAS CHILD**
Please collect a box
and fill with items as per
the requirements.

Don't forget to help
out with the postage
costs by paying
the \$10 cost.

Please have the
filled boxes returned
to Church by 15th September.

Jan has suggested
packing boxes for older
boys as the organisers
find they don't have
enough boxes for
this age group.

They love getting
T-shirts & shorts as well
as the toys and toiletry
items suggested.

YOUR ELDERS:

Alan Davy – 6585 5713 Niki Bryan— 0410 512 416
Derek Bates – 6585 4191 Phil Rowe— 0473 409 669
Pip Bryan— 0408 396 187

**WHERE LOVE WORKS.
LOVING GOD, LOVING PEOPLE,
LOVING OUR COMMUNITY**

Sunday 8 July 2018

Welcome all

Let us therefore come boldly to the throne of grace,
that we may obtain mercy and find grace
to help in time of need.

Heb 4:16

Please join us for a cup of tea or coffee and a chat after the service

Roster Info

DATE	COMMUNION	HELPERS	PRAYER	READER	PREACHER
8.7.18	Kerry	Judy / Harry	Niki		Worship
15.7.18	Derek	Janine / Pip	Kerry	Janine	TBA
22.7.18	Phil	/ Niki	Greg	Janette	TBA
29.7.18	Marguerite	Ruth / Harry	Pip	Pip	TBA
5.8.18	Pip	Judy / Niki	Derek	Kerry	Greg
12.8.18	Niki	Janine / Pip	Niki	Jan	TBA
19.8.18	Kerry	/ Ruth	Kerry	Judy	TBA
26.8.18	Derek	Harry / Judy	Greg	Janine	TBA

CREATION MOMENTS

THIS WEEK'S CREATION MOMENT

"Primitive" Electric Eel Not So Primitive After All

Electric eels release strong electric current into the water to make fish thrash about and come out of hiding. Now scientists have discovered another shockingly sophisticated trick used by electric eels. As reported by Reuters, "Vanderbilt University

neurobiologist Kenneth Catania said some have viewed electric eels as unsophisticated, primitive creatures with a single tool in the toolbox, shocking their prey to death." But he added, "In reality, they manipulate their electric fields in complex ways that only now are being appreciated."

Basically, electric eels brings their positive end – located in their head – close to the negative end in their tail. By trapping their prey between the positive and negative ends of their "battery", the eels are able to more than double the voltage inflicted on prey. According to Catania, "We know from basic physics that bringing two electrical poles together concentrates the electric field, and we know from basic muscle physiology that running a muscle too fast for too long causes exhaustion. But I would never have imagined an electric eel could produce the same results."

The reason he didn't imagine this is because he believes – despite the evidence – that electric eels are primitive creatures produced by non-intelligent chance mutations. But creationists who study electric eels aren't shocked by their sophisticated abilities. We know they were created just one day before man.

Ref: Will Dunham, "Zap happy: electric eels innovative in subduing hapless prey," Reuters, 10/28/15.
